HEALTH QUESTIONNAIRE FORM

Fallon
ORAL SURGERY AND IMPLANTOLOGY OF SYRACUSE

I. General Information

Name: _____ Date: _____

Reason for today's office visit: _____

To Our Patients: Although oral surgeons treat the area in and around your mouth, your mouth is part of your entire body. Health problems that you may have or medication that you are taking could have an important relationship with the care that you are receiving. Thank you for answering the following questions. Your answers are for our records only and will be considered confidential

☐ Yes ☐ No Are you in good health? Height: _____ Weight: _____

☐ Yes ☐ No Have there been and changes in your general health in the past year?

_____

☐ Yes ☐ No Are you under the care of a physician? Date of last visit: _____
If YES, for what are you being treated? _____

☐ Yes ☐ No Have you had any illness, operation, or been hospitalized in the past five years?
If YES please list: _____

HIPPA CONTACT RELEASE FORM

Dear Patient,

In order to help us stay within the guidelines of HIPAA, please list below any Person/persons that you authorize to disclose information to regarding your Protected Health Information, including billing information. (You do not need to list any of your doctors).

Name: **Relationship:**

Name: **Relationship:**

▶**Purpose of Consent:** By signing this form, you will consent to our use and disclosure of your protected health information to carry out treatment, payment activities, and healthcare operations.

▶**Notice of Privacy Practices:** You have the right to read or Notice of Privacy Practices before you decide whether to sign this Consent. Our Notice provides a description of our treatment, payment activities, and healthcare operations, of the uses and disclosures we may make of your protected health information, and of other important matters about your protected health information. A copy of our Notice accompanies this Consent. We encourage you to read it carefully and completely before signing this Consent.

We reserve the right to change our privacy practices as described in our Notice of Privacy Practices. If we change our privacy practices, we will issue a revised Notice of Privacy Practices, which will contain the changes. Those changes may apply to any of your protected health information that we maintain.

You may obtain a copy of our Notice of Privacy Practices, including any revisions of our Notice, At any time by contacting:

Contact Person: Paul T., Timothy J., Paul Casey Fallon, and Kipp Slocum
Telephone: (315) 451-6988
Fax: (315) 453-0150
Address: 4820 West Taft Road, Liverpool, NY, 13088

▶**Right to Revoke:** You will have the right to revoke this Consent at any time by giving us a written notice of your revocation submitted to the Contact Person listed above. Please understand that revocation of this Consent will *not* affect any action we took in reliance on this Consent before we received your revocation, and that we may decline to treat you or to continue treating you if you revoke this Consent.

▶**Fees & Payments:** Although we accept payments from your insurance company toward your account, you are responsible for you full account. I am aware that they accept Master Card and Visa. **WE ARE A NON-PARTICIPATING PROVIDER FOR ANY INSURANCE COMPANY.** I am also aware that my balance must be cleared within three (3) months from the day of treatment. I realize that in the event my account becomes past due and is turned over for collection, I agree to pay the collection fee based on my amount outstanding. This signature on file is my authorization for the release of my information necessary to process my claim. I hereby authorize payment to this doctor named of the benefits otherwise payable to me.

SIGNATURE OF GUARANTOR: **Date:**

▶**Signature:** I, _____, have had full opportunity to read and consider the contents of this Consent form and your Notice of Privacy Practices, I understand that, by signing this Consent form, I am giving my consent to your use and disclosure of my protected health information to carry out treatment, payment activities and health care operations.

CONSENT FOR ANESTHESIA & EXTRACTION OF TEETH

Fallon
ORAL SURGERY AND IMPLANTOLOGY OF SYRACUSE

Patient's Name: **Date:**

Please initial each paragraph after reading. If you have any questions, please ask your doctor BEFORE initialing.

Extraction of teeth is an irreversible process and, whether routine or difficult, is a surgical procedure. As in any surgery, there are some risks. They include, but are not limited to, the following:

_____1. Swelling and/or bruising and discomfort in the surgery area.

_____2. Stretching of the corners of the mouth resulting in cracking or bruising.

_____3. Possible infection requiring additional treatment.

_____4. Dry socket – jaw pain beginning a few days after surgery, usually requiring additional care. It is more common from lower extractions, especially wisdom teeth.

_____5. Possible damage to adjacent teeth. Especially those with large fillings or caps

_____6. Numbness, pain, or altered sensations in the teeth, gums, lip tongue (including possible loss of taste sensation) and chin, due to the closeness of tooth roots (especially wisdom teeth) to the nerves which can be bruised or damaged. Almost always sensation returns to normal, but in rare cases, the loss may be permanent.

_____7. Trismus – limited jaw opening due to inflammation or swelling, most common after wisdom tooth removal. Sometimes it is a result of jaw joint discomfort (TMJ), especially when TMJ disease already exists.

_____8. Bleeding – significant bleeding is not common, but persistent oozing can be expected for several hours.

_____9. Sharp ridges or bone splinters may form later at the edge of the socket. These usually require another surgery to smooth or remove.

_____10. Incomplete removal of tooth fragment – to avoid injury to vital structures such as nerves or sinus sometimes small root tips may be left in place.

_____11. Sinus involvement – the roots of upper back teeth are often close to the sinus and sometimes a piece of root can be displaced into the sinus or an opening may occur into the mouth that may require additional care.

_____12. Jaw fracture – while quite rare, it is possible in difficult or deeply impacted teeth

TREATMENT / PROGRESS NOTES

Fallon
ORAL SURGERY AND IMPLANTOLOGY OF SYRACUSE

Teeth to be removed / Procedure: _____

Alternative treatment: _____

_____

GENERAL RISKS OF BONE GRAFTING

____ 1. Bleeding, swelling or infection at the donor site requiring further treatment.
____ 2. Allergic or other adverse reaction to drugs used during or after the procedure.
____ 3. The need for additional or more extensive procedures in order to obtain sufficient bone for grafting.

RISKS AND COMPLICATIONS OF GRAFTING FROM WITHIN THE MOUTH AREA

____ 1. Damage to adjacent teeth which may require future root canal procedures or may cause loss of those teeth.
____ 2. Removal of adult teeth in order to obtain sufficient bone material.
____ 3. Numbness or pain in the area of the donor or recipient site, or more extensive areas, which may be temporary or permanent.
____ 4. Penetration of the sinus or nasal cavity in the upper jaw which could result in infection or other complication requiring addition drug or surgical treatment.

ANESTHESIA:

LOCAL ANESTHESIA: (Novocain, Lidocaine, etc.) is given to block pain pathways in a localized area.

LOCAL ANESTHESIA WITH NITROUS OXIDE: Nitrous Oxide (or Laughing Gas) helps to decrease uncomfortable sensations and offers some degree of relaxation.

LOCAL INTRAVENOUS SEDATION OR GENERAL ANESTHESIA: alters your awareness of the procedure by producing sedative/amnesiac effects, or sleep.

Whichever technique you choose, the administration of any medication involves certain risks. These include:

1. Nausea and vomiting
2. An allergic or unexpected reaction. If severe, allergic reactions might cause more serious respiratory (lung) or cardiovascular (heart) problems which may require treatment.

In addition, there may be:

1. Pain, swelling, inflammation or infection of the area of the injection.
2. Injury to nerves or blood vessels in the area.
3. Disorientation, confusion, or prolonged drowsiness after surgery.
4. Cardiovascular or respiratory responses which may lead to heart attack, stroke, or death.

Fortunately, these complications and side effects are not common. Well-monitored anesthesia is generally very safe, comfortable, and well-tolerated. <u>If you have any questions, PLEASE ASK.</u>

Fallon
ORAL SURGERY AND IMPLANTOLOGY OF SYRACUSE

I have read and understand the above and give my consent for:

- ☐ Local Anesthesia
- ☐ Local Anesthesia with Nitrous Oxide/Oxygen Analgesia
- ☐ Local Anesthesia with Intravenous Sedation or General Anesthesia

CONSENT

I have read and understand the above and give my consent to surgery. I further state that if I have IV sedation or General Anesthesia, that I HAVE NOT HAD ANY SOLIDS OR LIQUIDS BY MOUTH FOR **SIX (6) HOURS** PRIOR TO SURGERY. **TO DO OTHER WISE MAY BE LIFE-THREATENING!** I agree not to drive myself home and to have a responsible adult accompany me until I am recovered from my medications. I have given a complete and truthful medical history, including all medications, drug use, pregnancy, etc. I certify that I speak, read and write English.
